

Planungsteam Betzler

G m b H

Nienstedtener Marktplatz 29 • 22609 Hamburg • Germany

The Speaker:

Florian Betzler, CEO of Planungsteam Betzler GmbH (Hamburg, Germany) presents his solution for a Climate Cooling Chance thru his unique Architecture.

With his network he supplied a calculation tool to the market that allows estimating the **CLIMATE COOLING CAPACITY OF HIS DESIGNS**. Please follow him by demonstrating his **CITY COOLING DESIGNS**.

His outstanding Architecture with his city changing designs is a step towards **FINANCIALLY HIGH PERFORMANCE BUILDINGS** in combination with **BEAUTIFUL AND ENVIROMENTAL LANDMARKS**.

He is internationally approved as key speaker, lecturing in the Emirates, the USA, Australia, and India and teaches at the Wismar University of Technology to international Master Students in "Architecture and Environment" and "Future Living".

Please follow his Lecture:

You will learn about the architectural design that fight the cities' heat problem, and also presenting beautiful solutions against the world wide climate change.

For investors:

This building design will return all extra costs within first third of its life circle because of cost efficiency during the rental phase and earning extra income from that point.

Climate Cooling, Environmental Architecture and Cost Efficiency are linked in a significant way.

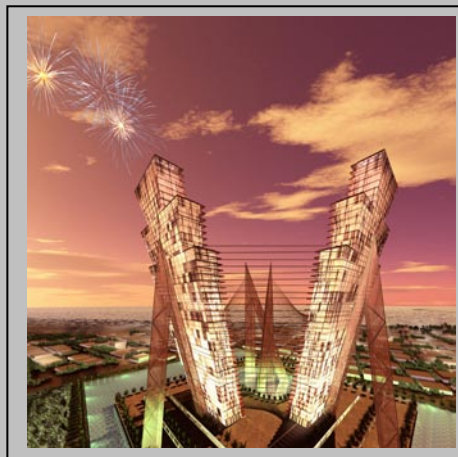

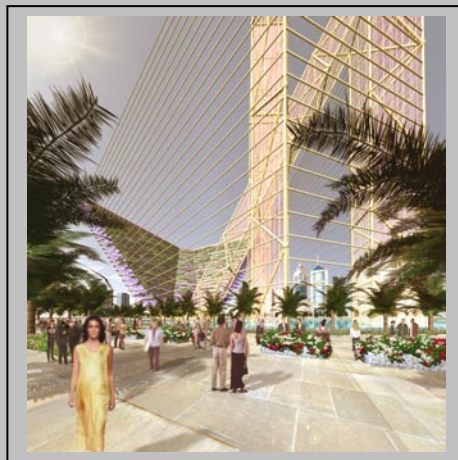

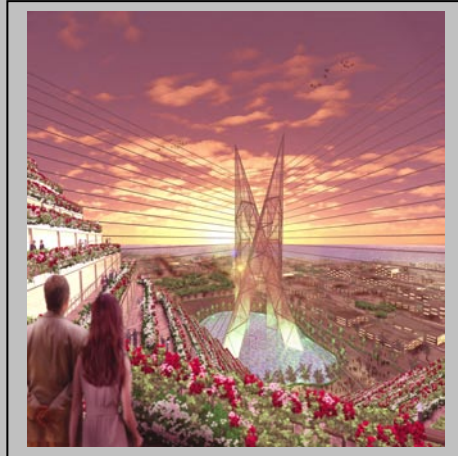

Our latest project shows a cooling capacity which is 20 times higher than its heat output to the environment and more.

It will show how to transform a cold concrete dessert into a beautiful green and environmental oasis.

Being innovative does not mean spending a lot of money – it means earning money!

Let's make cities more beautiful, more natural.

CHANGE GREEN – BE PART OF THE DREAM
